

Testing Trolley

About

The Testing Trolley can be booked and taken to any testing room environment. The unit holds equipment that facilitates physiological recordings, and electrical stimulation. This may be required for behavioural projects, or testing sessions associated to imaging.

Testing Trolley Booking

The Testing Trolley is a bookable resource. Availability can be seen on calpendo.

Bookings of the Testing Trolley can be made in the same way scanners and testing rooms are reserved. This process is outlined on the [Imaging Support Wiki](#)

Testing Trolley Equipment

The following is equipment is found on the Testing Trolley and can be used in testing rooms:

Standard Equipment

- [Physiological Recording](#)
 - Pulse
 - Breathing
 - Event Marking

Non-Standard Equipment

- [DS7a Electrical Stimulator](#)

User guides for this equipment can be found on the linked equipment pages. Use of the Non-Standard devices ([DS7a](#) & [GSR](#)) is permitted only for those who are trained.

Standard Testing Trolley User Guide

1. Retrieve Testing Trolley from EEG Prep-Room and position safely within a testing room.
2. Ensure the Testing Trolley is suitably positioned in the testing room, so that:
 1. PC Control Cable will reach Stimulus PC if required
 2. Researcher can access for Spike laptop
 3. No trip hazards are created
3. Connect the Testing Trolley to a power source.

1. From the lowest shelf connect the single transformer plug labeled 'Power to Testing Trolley' to a mains supply.
4. Connect the PC Control Cable to the parallel port on the Stimulus PC.
 1. This is required MATLAB/script events will be marked on the Spike software.
5. Log-in to Spike Laptop and load the default configuration file
 1. No password is required to login.
 2. File > Load Configuration > Navigate to 'C:\Desktop\Public Desktop' > Choose configuration file 'standard_scanner_qrs_pulse_breathing_gsr' > Click 'Open'
6. Log-in and prepare necessary scripts on STIM-PC
